

Company Profile

About Modern Arab Communications

Founded in 2008, Modern Arab Communications (MAC) is a leading value-added distributor specializing in unified communications and emerging technologies. Recognized for innovation and excellence, MAC partners with world-class technology providers to deliver cutting-edge solutions that empower businesses across Egypt.

Since its inception, MAC has been the exclusive distributor of Jabra headsets in Egypt, ensuring premium audio solutions for enterprises and professionals. In 2020, as part of its commitment to superior service and future business continuity, MAC expanded its portfolio by becoming an authorized partner for a wide range of enterprise products, strengthening its position as a trusted technology distributor.

With a focus on quality, reliability, and customer success, MAC continues to drive digital transformation by offering advanced communication solutions tailored to the evolving needs of businesses.

VISION

To be the leading force in transforming enterprise communication across Egypt and the region, by delivering innovative technologies, fostering strategic partnerships, and enabling businesses to thrive in a connected digital world.

MISSION

At Modern Arab Communications (MAC), our mission is to empower businesses with innovative communication solutions that drive efficiency, collaboration, and growth. We strive to deliver world-class technologies through trusted partnerships, exceptional service, and a commitment to shaping the future of enterprise connectivity in Egypt and beyond.

Core Values

- **Innovation** – Continuously embracing emerging technologies to deliver cutting-edge solutions.
- **Integrity** – Building trust through transparency, honesty, and ethical business practices.
- **Customer-Centricity** – Placing our clients’ success at the heart of everything we do.
- **Excellence** – Committed to delivering superior quality and service in every interaction.
- **Collaboration** – Fostering strong partnerships with technology providers and customers to achieve shared goals.

Modern Arab Communications

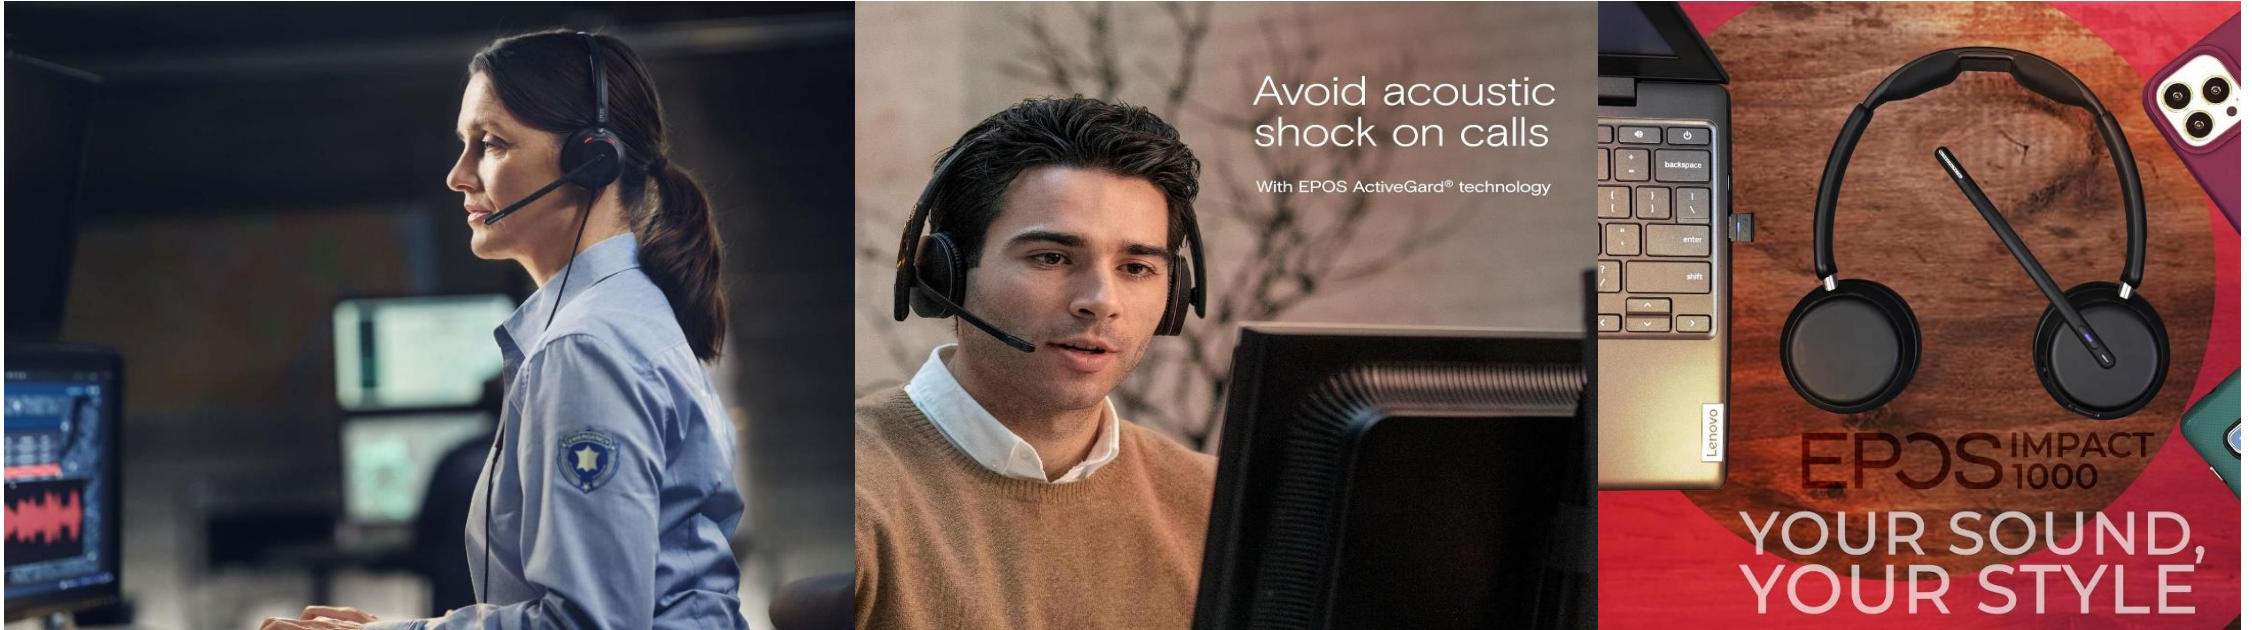

Jabra – A Core Pillar of MAC

Jabra is globally renowned for innovation in sound technology, offering products such as noise-cancelling headphones, sports earbuds with heart rate monitors, and advanced unified communications solutions. Their portfolio serves diverse sectors including offices, call centers, healthcare, and security—emphasizing superior sound quality, comfort, durability, and advanced features like active noise reduction and voice assistant integration.

The Jabra Enterprise Business is considered the main pillar of MAC's operations. Through its long-standing expertise in voice, video, and headset distribution, MAC has supported hundreds of resellers across the region for over 13 years. Positioned at the center of the unified collaboration supply chain, MAC offers a broad range of product lines, ensuring businesses have access to the latest communication technologies.

EPOS – Engineered for Excellence

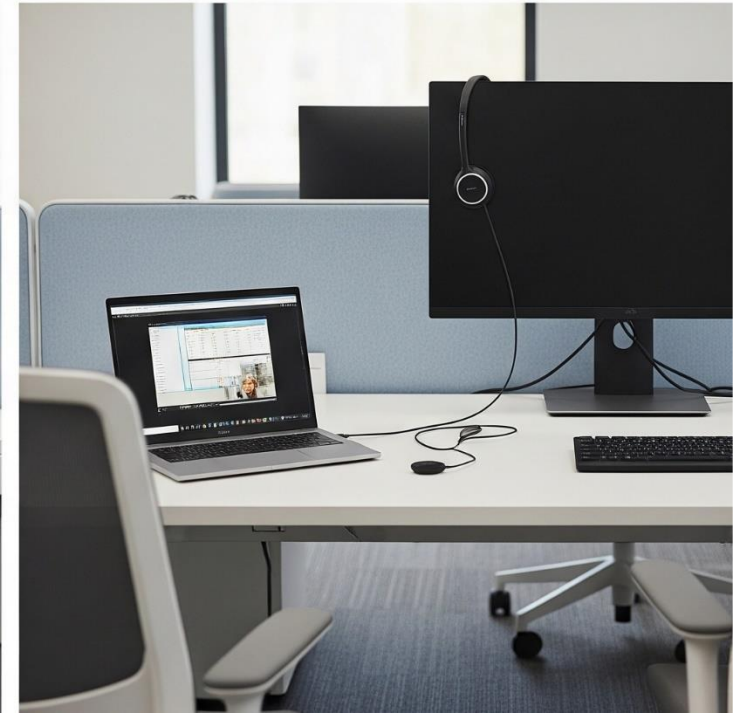

Made for Made for professionals who demand uncompromising quality, EPOS headsets are crafted from premium materials to ensure durability and long-lasting performance. Designed to deliver the perfect balance of superior audio clarity and exceptional comfort, EPOS products set the standard for professional communication.

For today's communication specialists, EPOS combines pioneering audio technology with ergonomic design, offering headsets that adapt to any workstyle—whether in the office, remote environments, or on the move. With advanced features and a focus on user experience, EPOS ensures seamless collaboration and productivity for modern professionals.

HP – Driving Hybrid Collaboration

HP's collaboration strategy is built around empowering the modern hybrid workforce, ensuring seamless communication and productive interactions regardless of location. This vision is powered by the integration of Poly solutions—following HP's acquisition of Plantronics and Polycom—and complemented by HP Presence offerings. Together, these solutions deliver advanced audio and video experiences that enable businesses to stay connected, collaborative, and efficient in today's dynamic work environments.

Teleconnectors is dedicated to creating intelligent connectivity solutions that simplify communication and enhance collaboration. By combining innovation with reliability, Teleconnectors delivers products designed to seamlessly integrate into modern communication ecosystems, ensuring businesses stay connected, productive, and future-ready.

Logitech – Team Video Conference Solutions

Logitech delivers high-performance video conferencing solutions designed to connect teams seamlessly, whether in the office, at home, or on the go.

With a focus on simplicity, reliability, and scalability, Logitech's portfolio includes advanced cameras, audio devices, and collaboration tools that integrate effortlessly with leading platforms like Microsoft Teams, Zoom, and Google Meet.

From huddle rooms to large conference spaces, Logitech solutions provide crystal-clear video, superior audio, and intuitive controls—empowering organizations to create productive, engaging meeting experiences for the modern hybrid workforce.

Product Highlights

- **Logitech Rally Bar** – All-in-one video medium to large rooms.
- **Logitech Meetup** – Compact solution for huddle rooms
- **Logitech Tap** – Touch controller for streamlined meeting
- **Logitech Brio** – Ultra-HD webcam for professional use.

Key Features

- **Crystal-Clear Video** Advanced cameras with ultra-HD resolution and smart framing for natural, lifelike meetings.
- **Superior Audio** Quality Noise-canceling microphones and speakers ensure clear conversations without distractions.
- **Platform Compatibility** Fully certified for Microsoft Teams, Zoom, Google Meet, and other leading platforms.
- **Scalable Solutions** From huddle spaces to large boardrooms, Logitech offers flexible setups for every need.
- **Easy Management** Centralized device management tools for effortless deployment and monitoring.

VIDEO BARS AND CONFERENCE CAMERAS

Rally Plus

Logitech Rally Plus is the modular video conferencing system for large and extra-large rooms. Discover integrated, simple, modular video conferencing with best-in-class optics and audio.

Meetup 2

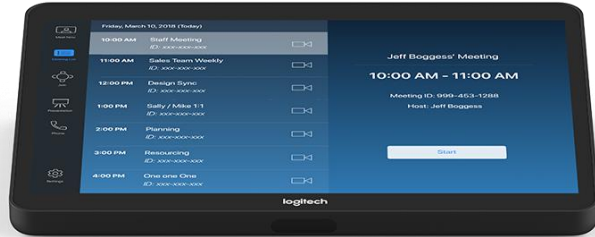

Upgrade your small meeting rooms with MeetUp 2, a USB conference camera for small spaces powered by AI features that simplify the meeting experience for both employees and IT.

Rally Camera

Rally Camera delivers premium performance in professional meeting spaces of all shapes and sizes. With whisper-quiet mechanical-Pan/Tilt/Zoom, razor-sharp 15X HD zoom, expansive 90° diagonal field of view, and powerful 4K sensor.

TOUCH CONTROLLERS AND SCHEDULING PANELS

TAP

Meeting room touch controller that delivers one-touch join and easy content-sharing and is simple to set up.

TAP IP

Meeting room touch controller connected via the network that delivers one-touch join and easy content-sharing and is simple to set up.

TAP SCHEDULER

Purpose-built scheduling panel for meeting spaces. Indicates availability from a distance and displays meeting details up close.

LG delivers cutting-edge display and collaboration solutions designed to inspire innovation, enhance teamwork, and enable creativity. With advanced technology and sleek designs, LG products transform workspaces into dynamic environments where ideas flow effortlessly.

- Barco ClickShare is a product offered by Barco, a global technology company that specializes in visual solutions for a wide range of industries. ClickShare is a wireless presentation system that allows users to easily share content from their laptops or mobile devices onto a central display or projector.
- Another benefit of Barco ClickShare is its flexibility. The system supports a wide range of devices, including laptops, tablets, and smartphones, which allows users to share content from their device of choice. Additionally, ClickShare supports multiple operating systems such as Windows, Mac, iOS, and Android.

Wireless Conferencing Solutions

ClickShare offers wireless conferencing systems that simplify meetings and support hybrid collaboration.

Product Line Variants

Models like CX-20, CX-30, CX-50, C-5, and C-10 suit various room sizes and use cases.

Advanced Features

Supports 4K sharing, dual displays, modular setups, and integration with Microsoft Teams and Zoom.

Crestron – Smart AV, Automation & Collaboration Solutions

Crestron is a global leader in audio-visual, automation, and collaboration technologies, delivering intelligent solutions for modern workspaces and smart environments. Known for reliability, innovation, and elegant design, Crestron products enable seamless integration and control across meeting rooms, classrooms, and smart buildings.

Shure – Professional Audio Solutions

COMPONENTS

Shure is a world-renowned leader in professional audio technology, delivering products that set the standard for clarity, reliability, and performance. From microphones and conferencing systems to advanced audio processing, Shure solutions empower organizations to communicate effectively in any environment.

SOFTWARE

INTELLIGENT RF PERFORMANCE

Transmitters become instantly active when removed from the Networked Charging Station. While the system is in use, the Access Point Transceiver actively scans the available spectrum, automatically coordinates clean frequencies for every microphone channel and moves away from unexpected interference.

THE POWER OF THE PLATFORM

Tesira™ is our flagship open-architecture platform for networked audiovisual processing and signal distribution. Sophisticated programmable signal processing is the core of what Tesira delivers, providing a processing solution for every space type.

Microphones

The Parlé™ family of Beamtracking™ microphones provides 360° room coverage with little to no setup or programming time required. Available in ceiling, pendant, and tabletop form factors, each microphone actively tracks and intelligently mixes conversations from around the room, ensuring seamless conferencing experiences every time.

Digital Signal Processors

Tesira SERVER and SERVER-IO are configurable I/O digital signal processors (DSPs).

Expanders

Tesira's PoE+ powered expanders are compatible with Tesira audio DSPs and support a variety of capabilities including additional analog audio channels, USB audio, and Bluetooth® wireless technology.

Amplifiers

Tesira amplifiers let you create a more complete audio system that can be designed and commissioned from one software platform.
