SPIROGYRE sweep augers are ATEX certified
PROOF OF QUALITY OF OUR SWEEP AUGERS

ATEX CERTIFICATION

Certification II T2D 125°C

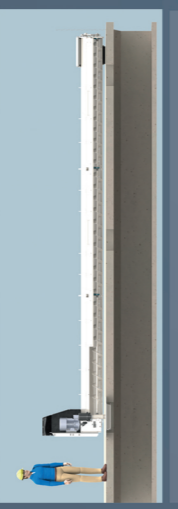

SPIROGYRE ^{EX} : the motor is moved off-centre below the silo floor, transmission via a pulley-belt system under a closed casing.
ADVANTAGES : high gravity capacities, wide range of discharge capacities, heavy-duty design, easy maintenance, retrofittable.

TYPE SCD

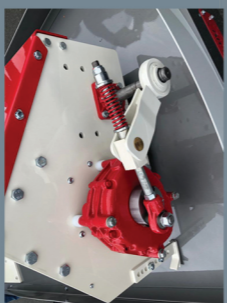

SPIROGYRE ^{EX} : the electric motor is inside the silo, directly coupled to a reducer driving the auger. Power is supplied by a rotary collector.
ADVANTAGES : adapted to limited space under the silo, simplicity, efficiency, adaptability, retrofittable.
Certification II 2D 125°C

2 VERSIONS S TYPE

"ZERO HUMAN ENTRY"

SPIROGYRE

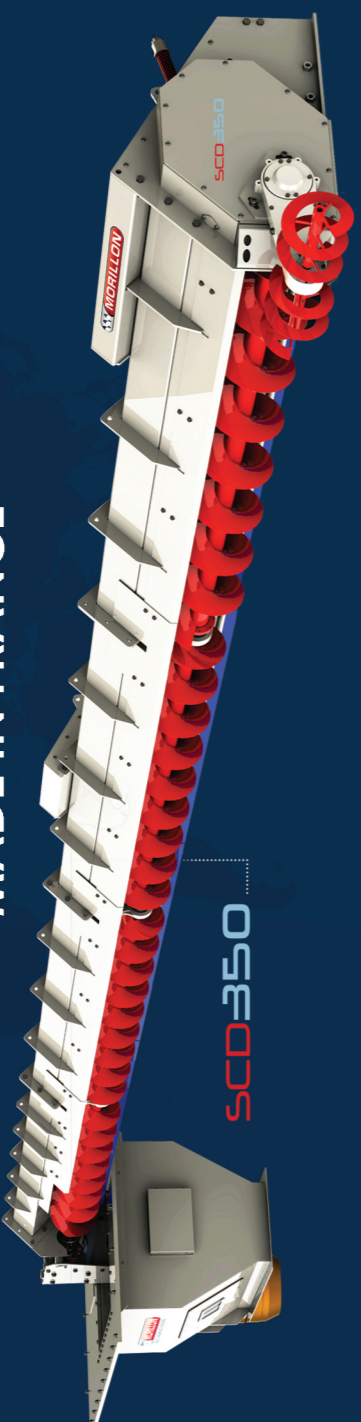

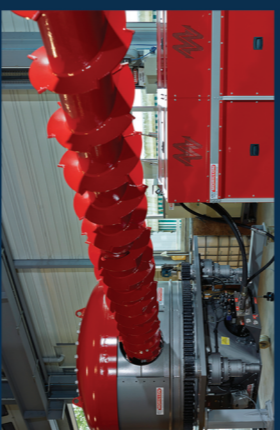

A sturdy squirrel cage wheel ensures a constant feed of the auger by means of strong adherence to the ground and an ingenious reverse-lock mechanism.

ADVANCE WHEEL

3 MAIN ADVANTAGES

- ▶ Sections pre-assembled in our workshop
- ▶ Mounting simplification
- ▶ Reduction of installation costs
