TANTA

For Integrated Agricultural Services

Who we are

About the Company

Tanta Company for Integrated Agricultural Services was established in 2007. With twenty years of experience in the field of pivot irrigation, it is considered one of the companies specialized in providing modern irrigation solutions and comprehensive agricultural services. It offers the latest global technologies in pivot irrigation and smart farming for agricultural projects of all sizes. Since its founding, the company has set a clear goal: to support the Egyptian agricultural sector by providing innovative solutions that help increase agricultural productivity, improve the efficiency of water and energy use, and achieve the highest economic returns for investors and farmers. The company relies on a team of specialized engineers and technicians who have extensive experience in designing, implementing, and managing modern irrigation systems according to the highest global quality standards.

Integrated solutions for sustainable agricultural development

Why TANTA?

Technical support and maintenance all year round.

Partnerships with leading global companies.

Commitment to the highest standards of quality and efficiency.

Specialized experience in modern irrigation systems.

Comprehensive services from study all the way to operation.

Our Partners and Global Technologies

Tanta Integrated Agricultural Services is proud to collaborate with major global companies specializing in irrigation systems and smart farming.

Your partner for a more productive
and sustainable agricultural future

TANTA

For Integrated Agricultural Services

Our Vision

Our Vision & Mission

Our Vision

To be one of the partners in providing comprehensive agricultural solutions and smart irrigation systems in Egypt and the Middle East by offering innovative technologies that support sustainable agricultural development.

Our Mission

To provide advanced engineering and agricultural solutions that help our clients achieve the highest possible productivity while making optimal use of natural resources, especially water and energy.

Integrated solutions for sustainable agricultural development

Our Value

Customer Services

Providing continuous support that ensures the success of our clients' projects.

Sustainability

Preserving natural resources and supporting sustainable agricultural development.

Innovation

Applying the latest irrigation and smart farming technologies.

Integrity

Building long-term relationships based on trust and transparency

Quality

Committing to the best global standards in all our services

Your partner for a more productive
and sustainable agricultural future

TANTA

For Integrated Agricultural Services

Our main Services

Center Pivot Irrigation Systems

Providing, installing, and operating advanced center pivot irrigation systems for farms and large agricultural projects.

Linear irrigation systems

Advanced solutions for efficiently irrigating lands of different shapes.

Pumping systems & water stations

Designing and implementing integrated pumping stations and their associated control systems.

Fertilization Systems

Integrating fertilization with irrigation systems to ensure an optimal distribution of nutrients.

Smart control systems

Advanced operating and monitoring systems to manage remote irrigation operations.

Engineering consulting services

Preparing technical studies and designing irrigation networks according to the nature of each project.

Integrated agricultural solutions... towards a more productive and sustainable future
